Comments: (If possible, please reference section number and/or page number in document if applicable.)

Today, I was told of the subjects
 of the plans for Yucca Mtn. I think
 that too much is at risk with bringing
 radioactive waste to my home town.
 Our earth can't be replaced, if we
 ruin it, it's gone and we can't bring
 life back. This nuclear waste will
 slowly kill life forms around Yucca Mtn.
 and eventually the rest of the country,
 then beyond. I wonder why your organization
 can't test this "Plan" other ways than
 with computers. Hasn't anyone noticed
 the change in the earth's movements?
 If we get earthquake results, your
 concrete around the cask full of waste,
 it will break, then what? There really
 is nothing we can do but leave it where
 it is!

Please note: For your comment(s) to be considered in the Final Environmental Impact Statement, your comment(s) need to be received by the Department of Energy by February 9, 2000. To the extent practicable the Department will consider comments received after February 9.

Please feel free to attach additional pages; more postage may be needed. If you prefer to mail your comments, you may use the back side of this sheet as a postage-paid, self-mailer. To do so, fold in thirds along the dotted line so address and postage-paid notice are visible; then secure with tape.
